

Main Technical Parameters of Double Stacker for Pit Stack Parking

Car Capacity	3×N, N refers to number of transverse spans.
Lifting Speed	2.5m/min
Elevating Motor Power	3.7kw
Power Supply	Three phase/380V/50Hz

The main size parameters and capacity specification table of the Triple Stacker for Pit Stack Parking

Model	Size Parameter (mm)		capacity specification	
	L	W	vehicle length×vehicle width×vehicle height (mm)	Weight (kg)
PJSxD/yZ-3LT	5000	2400	Storey One: 5000×1850×1550	1700
			Pit parking space: 4700×1800×1450	1500
PJSxT/yD-3LT	5200	2500 (2450)	Storey One: 5300×1900×1550	2350
			Pit parking space: 5000×1850×1550	1700

Note: This picture is a three-span device, and the number of spans can be increased or decreased according to the site space.
